DIRECTIONS FOR USE

For best results, use watered-in applications. May be applied via irrigation system or prior to irrigation. Apply enough water to move the product into the area of active rooting, but not excessive amounts that may leach. Use the higher label rates with surface and flood irrigation. Shake well and/or agitate before use.

Do not mix in concentrated form with any other tank additive without first adding water. Recommended mixing sequence: Water, adjuvants, pesticides, FBSciences nutrient products, other fertilizers then agitate. When mixing with high phosphate fertilizers, add a citric acid buffer until the pH is 4.5 to 5.0 to improve compatibility and uptake. Ensure agitation is available when mixing with calcium fertilizers. DO NOT mix with crop oil concentrates without first consulting your local agronomist. A standard jar test is recommended before tank mixing.

RATES & TIMING FOR ALL CROPS

For **Orchards & Vineyards** apply **1-6 quarts/acre** any time during growing season; repeat as needed.

For **All Other Crops** apply **1-4 quarts/acre** any time during growing season; repeat as needed.

INSTRUCCIONES DE USO

Para obtener mejores resultados, usar aplicaciones con agua. Puede aplicarse a través del sistema de riego o antes del riego. Aplicar suficiente agua para mover el producto al área de enraizamiento activo, pero no cantidades excesivas que puedan filtrarse. Usar las tasas de etiqueta más altas con riego por inundación y por superficie. Agitar bien y / o agitar antes de usar.

NO mezclar con otros productos en forma concentrada sin antes agregar agua. Secuencia de mezcla recomendada: Agua, adyuvantes, pesticidas, productos nutritivos de FBSciences, otros fertilizantes y luego agitar. Cuando mezcle con fertilizantes con alto contenido de fosfato, agregar un neutralizador de ácido cítrico hasta que el pH sea de 4.5 a 5.0 para mejorar la compatibilidad y la absorción. Asegurarse de que haya agitación disponible al mezclar con fertilizantes de calcio. Se recomienda una prueba de jarra estándar antes de mezclar en el tanque.

TASAS Y MOMENTO PARA TODOS LOS CULTIVOS

Para **Huertos y Viñedos**, aplicar de **1 a 6 cuartos de galón/acre** en cualquier momento durante la temporada de crecimiento; repetir según sea necesario.

Para **todos los otros cultivos**, aplicar de **1 a 4 cuartos de galón/acre** en cualquier momento durante la temporada de crecimiento; repetir según sea necesario.
