DIRECTIONS FOR USE

DO NOT spray in the heat of the day or when the plant is under moisture stress. DO NOT spray to the point of runoff. Use as fine of a spray mist as possible. Allow 3-4 hours after application before sprinkler irrigating to avoid washing the product off.

Recommended mixing sequence: water, adjuvants, pesticides, FBSciences nutrient products, other fertilizers, balance of water while agitating. When mixing with high phosphate fertilizers, add a citric acid buffer until the pH is 4.5 to 5.0 to improve compatibility and uptake. Ensure agitation is available when mixing with calcium fertilizers. A standard jar test is recommended before tank mixing.

RATES & TIMING FOR ALL CROPS

For **Orchards & Vineyards** apply **1-6 quarts/acre** any time during growing season; repeat as needed. Always use the higher rate with spray volume greater than 50 gallons per acre.

For **All Other Crops** apply **1-4 quarts/acre** any time during growing season; repeat as needed.

INSTRUCCIONES DE USO

NO rociar en el calor del día o cuando la planta esté bajo estrés por humedad. NO rociar hasta el punto de escorrentía. Usar una niebla de rociado lo más fina posible. Esperar de 3 a 4 horas después de la aplicación antes del riego por aspersión para evitar lavar el producto.

Secuencia de mezcla recomendada: agua, adyuvantes, pesticidas, productos nutritivos de FBSciences, otros fertilizantes, balance de agua mientras se agita. Cuando se mezcle con fertilizantes de alto contenido de fosfato, agregar un regulador de ácido cítrico hasta que el pH esté de 4.5 a 5.0 para mejorar la compatibilidad y la absorción. Asegurarse de que la agitación esté disponible cuando se mezcle con fertilizantes de calcio. Se recomienda una prueba de jarra estándar antes de mezclar el tanque.

TASAS Y MOMENTO PARA TODOS LOS CULTIVOS

Para huertos y viñedos, aplicar de **1-6 cuartos de galón/acre** en cualquier momento durante la temporada de crecimiento; repetir según sea necesario. Siempre usar la dosis más alta con un volumen de rociado mayor a 50 galones por acre.

Para todos los demás cultivos, aplicar de **1-4 cuartos de galón/acre** en cualquier momento durante la temporada de crecimiento; repetir según sea necesario.
