DIRECTIONS FOR USE

For best results, use watered-in applications. May be applied via irrigation system or prior to irrigation. Apply enough water to move the product into the area of active rooting, but not excessive amounts that may leach. Use the higher label rates with surface and flood irrigation. Shake well and/or agitate before use.

Do not mix in concentrated form with any other tank additive without first adding water. Recommended mixing sequence: Water, adjuvants, pesticides, FBSciences nutrient products, other fertilizers then agitate. When mixing with high phosphate fertilizers, add a citric acid buffer until the pH is 4.5 to 5.0 to improve compatibility and uptake. Ensure agitation is available when mixing with calcium fertilizers. DO NOT mix with crop oil concentrates without first consulting your local agronomist. A standard jar test is recommended before tank mixing.

RATES & TIMING FOR ALL CROPS

Apply **1-8 quarts/acre** any time during growing season; repeat as needed.

INSTRUCCIONES DE USO

Para obtener mejores resultados, usar aplicaciones con agua. Puede aplicarse a través del sistema de riego o antes del riego. Aplicar suficiente agua para mover el producto al área de enraizamiento activo, pero no en cantidades excesivas que puedan filtrarse. Usar las tasas de etiqueta más altas con riego por inundación y por superficie. Agitar bien y / o agitar antes de usar.

No mezclar con otros productos en forma concentrada sin antes agregar agua. Secuencia de mezcla recomendada: Agua, adyuvantes, pesticidas, productos nutritivos de FBSciences, otros fertilizantes y luego agitar. Al mezclar con fertilizantes altos en fosfato, agregar un buffer de ácido cítrico hasta que el pH esté de 4.5 a 5.0 para mejorar la compatibilidad y la absorción. Asegurarse de que la agitación esté disponible cuando se mezcla con fertilizantes de calcio. NO mezclar con concentrados de aceite de cultivo sin antes consultar a su agrónomo local. Se recomienda realizar una prueba de jarra estándar antes de mezclar en el tanque.

TASAS Y MOMENTO PARA TODOS LOS CULTIVOS

Aplicar de **1 a 8 cuartos de galón / acre** en cualquier momento durante la temporada de crecimiento; repetir según sea necesario.
