About the Featured Photography

Several images featured throughout this year's Specialty Crop Product Guide were photographed on farms across the U.S. by Valent BioSciences team member, Brittney Madison.

WHY VALENT BIOSCIENCES

Our science-driven legacy of leadership and innovation is rooted in research, development, and proven results. As growers strive to sustainably optimize the efficiency of their operations, biostimulants are a vital tool to help maximize crop potential and increase ROI.

Bold claims are easy, but we're dedicated to proving our products deliver as promised.

60 YEARS OF AGRICULTURE EXPERTISE

For more than 60 years, Valent BioSciences has been driving innovation and adoption of biological crop inputs around the world. We prioritize continuous innovation and we're proud of our legacy of excellence in research and development. Every single day, we're driven by our desire to solve challenges faced by growers, helping them profitably sustain their farming operations.

Our reach is global. We're backed by the powerhouse, Sumitomo Chemical Co., Ltd., and fueled by our biorational research network, through which we collaborate with scientists and experts at the top of their fields around the world. And then we bring that science home to drive ROI on U.S. farms.

BenePhite® Expand						
Product Overview	<p>BenePhite® Expand is a phosphorus product built with Transit® biostimulant. By pairing phosphite, a highly plant-available form of phosphorus, with organic acids and key complementary nutrition, BenePhite Expand delivers a readily available nutritive boost to enhance photosynthetic activity for improved canopy development and fruit quality.</p> <ul style="list-style-type: none"> • Increased Canopy Development • Improved Fruit Quality • Reduced Risk of Phytotoxicity 					
Guaranteed Analysis	<p>Total Phosphoric Acid (P₂O₅) 19.0% Cobalt (Co) 0.05% Iron (Fe) 0.75% Manganese (Mn) 1.75% Molybdenum (Mo) 0.10% Zinc (Zn) 4.0%</p> <p><i>Derived from: Phosphorous acid, zinc phosphite, manganese phosphite, iron phosphite, cobalt nitrate, and sodium molybdate.</i></p>					
Formulations	BenePhite Expand

	Foliar: 0.5 – 4 qt/ac	Repeat every 2 – 3 weeks				
Soil: 2 – 6 qt/ac						

BoronBoost®											
Product Overview	<p>BoronBoost® is a boron product built with Transit® biostimulant that supports pollination for improved nut set and yield. Utilizing organic acids and key nutrition, BoronBoost improves pollen tube development and supports carbohydrate movement from the leaves to the nut for enhanced nut quality. BoronBoost is also available in our CAN-17 and CN-9 compatible formulation, BorCAN™.</p> <ul style="list-style-type: none"> • Increased Nut Fill • Improved Nut Quality • Optimized Formulations 										
BoronBoost Foliar	<p>Boron (B) 6.0%</p> <p><i>Derived from: Boron ethanolamine.</i></p>

BounceBack®		
Product Overview	BounceBack® is a calcium and nitrogen product built with Transit® biostimulant and plant extracts designed for high nutrient mobility and uptake within the plant. With organic acids from our Transit biostimulant and key nutrients, BounceBack provides rapid relief for crops under photosynthetic and respiration stress and supports better crop quality. <ul style="list-style-type: none"> • Improved Crop Quality • Heat Stress Mitigation 	
Guaranteed Analysis	Total Nitrogen (N) 4.0% Calcium (Ca) 8.0% Derived from: Calcium gluconate and calcium nitrate.	
Formulations	BounceBack Foliar	
Application Information	Use Rate	Application Timing
	1 – 6 qt/ac	Any time during the growing season; repeat as needed.

Calron®		
Product Overview	Calron® is a calcium product built with Transit® biostimulant designed for improved plant uptake and nutrient mobility within the xylem and phloem. With organic acids and complementary nutrition, Calron provides readily available calcium to support bud growth and enhanced fruit quality. <ul style="list-style-type: none"> • Bud Development • Improved Fruit Firmness 	
Guaranteed Analysis	Nitrogen (N) 3.0% Calcium (Ca) 8.0% Derived from: Calcium gluconate and calcium nitrate.	
Formulations	Calron Soil	
Application Information	Use Rate	Application Timing
	1 – 8 qt/ac	Any time during the growing season; repeat as needed.

This is not the complete label; see label for complete Directions for Use. Always read and follow label instructions. CellMate® Foliar Plus Mo		
Product Overview	CellMate® Foliar Plus Mo is a calcium product built with Transit® biostimulant for high nutrient mobility and uptake within the plant. With organic acids from our Transit biostimulant plus molybdenum and boron, CellMate provides critical nutrition to support pollination and cell wall integrity for increased fruit quality. <ul style="list-style-type: none"> • Improved Pollination • Enhanced Fruit Quality 	
Guaranteed Analysis	Nitrogen (N) 3.0% Calcium (Ca) 8.0% Boron (B) 0.5% Molybdenum (Mo) 0.2% Derived from: Calcium gluconate, calcium nitrate, boric acid, and sodium molybdate.	
Formulations	CellMate Foliar Plus Mo	
Application Information	Use Rate	Application Timing
	1 – 4 qt/ac	Any time during the growing season; repeat as needed.

ChloroDrive®		
Product Overview	ChloroDrive® is a nutrient product built with Transit® biostimulant. Utilizing organic acids and key complementary nutrition, ChloroDrive improves photosynthetic efficiency and facilitates superior translocation of sugars in the plant, resulting in better fruit quality. <ul style="list-style-type: none"> • Improved Photosynthesis • Increased TSS Content 	
Guaranteed Analysis	Total Magnesium (Mg) 2.0% Sulfur (S) 4.0% Manganese (Mn) 2.0% Zinc (Zn) 2.0% Derived from: Magnesium sulfate, manganese sulfate, and zinc sulfate.	
Formulations	ChloroDrive Foliar	
Application Information	Use Rate	Application Timing
	1 – 6 qt/ac	Any time during the growing season; repeat as needed.

This is not the complete label; see label for complete Directions for Use. Always read and follow label instructions. Copron®			
Product Overview	Copron® is a copper product that supports pollination. With organic acids from our Transit® biostimulant, Copron employs Transit-chelated copper to drive superior transport of copper nutrition in the xylem and phloem. <ul style="list-style-type: none"> • Improved Pollination • Optimized Formulations 		
Guaranteed Analysis	Sulfur (S) 2.5% Copper (Cu) 5.0% Derived from: Copper sulfate.		
Formulations	Copron Foliar, Copron Soil		
Application Information	Product	Use Rate	Application Timing
	Copron Foliar	0.5 – 1.5 qt/ac	Any time during the growing season; repeat as needed.
	Copron Soil	1.0 – 4.0 qt/ac	

DriveKP®		
Product Overview	DriveKP® is a dipotassium phosphate (DKP) product built with Transit® biostimulant and plant extracts, designed for high nutrient mobility and uptake within the plant. With organic acids from our Transit biostimulant and key nutrients, DriveKP supports improved crop quality. <ul style="list-style-type: none"> • Improved Crop Quality • Increased Nut Size and Berry Brix 	
Guaranteed Analysis	Available Phosphate (P ₂ O ₅) 19.0% Soluble Potash (K ₂ O) 26.0% Molybdenum (Mo) 0.05% Derived from: Dipotassium phosphate and sodium molybdate.	
Formulations	DriveKP	
Application Information	Use Rate	Application Timing
	Foliar: 1 – 6 qt/ac	Any time during the growing season; repeat as needed.
	Soil: 1 – 8 qt/ac	

This is not the complete label; see label for complete Directions for Use. Always read and follow label instructions. FBS Humate Plus™			
Product Overview	FBS Humate Plus™ is a highly concentrated humic acid product that allows for a low use rate. It increases cation exchange capacity (CEC) and increases water and nutrient retention in the rhizosphere for improved plant uptake from the soil. FBS Humate Plus is also available in a formulation suited for organic systems. <ul style="list-style-type: none"> • Improved CEC in the Rhizosphere • Enhanced Nutrient and Water Retention • Optimized Formulations 		
FBS Humate Plus	Soluble Potash (K ₂ O) 5.0%		
Guaranteed Analysis	Derived from: Potassium hydroxide. Also contains non-plant food ingredient: 19% humic acids derived from Leonardite.		
FBS Organic Humate Plus	Soluble Potash (K ₂ O) 4.0%		
Guaranteed Analysis	Derived from: Potassium hydroxide. Also contains non-plant food ingredient: 17% humic acids derived from Leonardite.		
Formulations	FBS Humate Plus, FBS Organic Humate Plus		
Application Information	Product	Use Rate	Application Timing
	FBS Humate Plus	0.5 – 1 qt/ac	Any time during the growing season; repeat as needed.
	FBS Organic Humate Plus	0.5 – 2 qt/ac	

GreenSurge®		
Product Overview	GreenSurge® is a magnesium product built with our Transit® biostimulant. Utilizing organic acids and key complementary nutrition, GreenSurge improves chlorophyll production for greater photosynthetic efficiency. <ul style="list-style-type: none"> • Improved Chlorophyll Production • Enhanced Photosynthetic Efficiency 	
Guaranteed Analysis	Magnesium (Mg) 4.0% Sulfur (S) 5.0% Derived from: Magnesium sulfate.	
Formulations	GreenSurge Foliar	
Application Information	Use Rate	Application Timing
	1 – 4 qt/ac	Any time during the growing season; repeat as needed.

This is not the complete label; see label for complete Directions for Use. Always read and follow label instructions. K-Surge®						
Product Overview	<p>K-Surge® is a potassium acetate product built with Transit® biostimulant, designed for high nutrient mobility and uptake within the plant. With organic acids from our Transit biostimulant and key nutrients, K-Surge supports sugar and water transport in plants for improved fruit development and quality.</p> <ul style="list-style-type: none"> • Better Water Uptake • Increased Brix 					
Guaranteed Analysis	<p>Soluble Potash (K₂O) 20.0% Boron (B) 0.05% Molybdenum (Mo) 0.03%</p> <p><i>Derived from: Potassium acetate, boric acid, and sodium molybdate.</i></p>					
Formulations	K-Surge					
Application Information	<table border="1"> <thead> <tr> <th>Use Rate</th> <th>Application Timing</th> </tr> </thead> <tbody> <tr> <td>Foliar: 1 – 6 qt/ac</td> <td rowspan="2">Any time during the growing season; repeat as needed.</td> </tr> <tr> <td>Soil: 1 – 5 gal/ac</td> </tr> </tbody> </table>	Use Rate	Application Timing	Foliar: 1 – 6 qt/ac	Any time during the growing season; repeat as needed.	Soil: 1 – 5 gal/ac
	Use Rate	Application Timing				
	Foliar: 1 – 6 qt/ac	Any time during the growing season; repeat as needed.				
Soil: 1 – 5 gal/ac						

Manron®									
Product Overview	<p>Manron® is a manganese product that supports photosynthesis. With organic acids from our Transit® biostimulant, Manron employs Transit-chelated manganese to support superior transport in the xylem and phloem.</p> <ul style="list-style-type: none"> • Increased Photosynthetic Efficiency • Optimized Formulations 								
Guaranteed Analysis	<p>Sulfur (S) 3.0% Manganese (Mn) 5.0%</p> <p><i>Derived from: Manganese sulfate.</i></p>								
Formulations	Manron Foliar, Manron Soil								
Application Information	<table border="1"> <thead> <tr> <th>Product</th> <th>Use Rate</th> <th>Application Timing</th> </tr> </thead> <tbody> <tr> <td>Manron Foliar</td> <td>0.5 – 3 qt/ac</td> <td rowspan="2">Any time during the growing season; repeat as needed.</td> </tr> <tr> <td>Manron Soil</td> <td>1 – 4 qt/ac</td> </tr> </tbody> </table>	Product	Use Rate	Application Timing	Manron Foliar	0.5 – 3 qt/ac	Any time during the growing season; repeat as needed.	Manron Soil	1 – 4 qt/ac
	Product	Use Rate	Application Timing						
	Manron Foliar	0.5 – 3 qt/ac	Any time during the growing season; repeat as needed.						
Manron Soil	1 – 4 qt/ac

MicroBlend™ Zn-Mn-Cu			
Product Overview	MicroBlend™ Zn-Mn-Cu is a zinc, manganese, and copper product built with Transit® biostimulant, designed for high nutrient mobility and uptake within the plant. With organic acids from our Transit biostimulant and key complementary nutrition, MicroBlend Zn-Mn-Cu utilizes Transit-chelated zinc, manganese, and copper to enhance nut fill and fruit enlargement. <ul style="list-style-type: none"> • Enhanced Nut Fill • Fruit Enlargement • Optimized Formulations 		
Guaranteed Analysis	Sulfur (S) 3.0% Copper (Cu) 1.0% Manganese (Mn) 3.0% Zinc (Zn) 3.0% Derived from: Zinc sulfate, manganese sulfate, and copper sulfate.		
Formulations	MicroBlend Foliar Zn-Mn-Cu, MicroBlend Soil Zn-Mn-Cu		
Application Information	Product	Use Rate	Application Timing
	MicroBlend Foliar Zn-Mn-Cu	1 – 4 qt/ac	Any time during the growing season; repeat as needed.
	MicroBlend Soil Zn-Mn-Cu	1 – 8 qt/ac	

Phosron®			
Product Overview	Phosron® is a phosphate product built with Transit® biostimulant, designed for high nutrient mobility and uptake within the plant to support early vegetative growth. With organic acids from our Transit biostimulant and key complementary nutrition, Phosron maximizes results for early season success. <ul style="list-style-type: none"> • Improved Early Vegetative Growth • Optimized Formulations 		
Phosron Foliar	Nitrogen (N) 7.0% Available Phosphate (P ₂ O ₅) 21.0% Soluble Potash (K ₂ O) 3.0% Molybdenum (Mo) 0.2% Derived from: Ammonium hydroxide, urea, phosphoric acid, potassium hydroxide, and sodium molybdate.		
Phosron Soil	Nitrogen (N) 7.0% Available Phosphate (P ₂ O ₅) 21.0% Molybdenum (Mo) 0.001% Zinc (Zn) 0.2% Derived from: Ammonium hydroxide, phosphoric acid, ammonium polyphosphate, zinc gluconate, and sodium molybdate.		
Formulations	Phosron Foliar, Phosron Soil		
Application Information	Product	Use Rate	Application Timing
	Phosron Foliar	2 – 5 qt/ac	Any time during the growing season; repeat as needed.
	Phosron Soil	5 – 20 gal/ac

PhotoGreen®			
Product Overview	PhotoGreen® is a nutrient product built with Transit® biostimulant, designed for high nutrient mobility and uptake within the plant. With organic acids from our Transit biostimulant and key nutrients, PhotoGreen improves photosynthetic efficiency and supports chlorophyll formation to maximize effects of canopy development. <ul style="list-style-type: none"> • Improved Photosynthesis • Enhanced Canopy Development • Optimized Formulations 		
Guaranteed Analysis	Iron (Fe) 5.0% Manganese (Mn) 1.0% Sulfur (S) 3.0% Derived from: Ferrous sulfate and manganese sulfate.
