

BounceBack®

Biostimulant

PRODUCT BENEFITS

BounceBack® is a calcium and nitrogen product built with Transit® biostimulant and plant extracts, designed for high nutrient mobility and uptake within the plant. With organic acids from our Transit biostimulant and key nutrients, Bounceback provides rapid relief for crops under photosynthetic and respiration stress and supports better berry firmness.

IMPROVED FRUIT QUALITY

Enhanced calcium mobility for increased fruit firmness and extended shelf life

HEAT STRESS MITIGATION

Supports rapid relief and recovery from heat stress

OPTIMIZED FORMULATION

Designed for superior leaf penetration and enhanced nutrient mobility to drive results in the field

BounceBack[®]

Biostimulant

BounceBack Overview

- Utilizes Transit[®]-chelated calcium and nitrogen for increased translocation in the plant
- Superior foliar formulation for leaf penetration
- Increases cellular strength for increased fruit firmness
- Improves respiration and heat stress recovery

Complementary Nutrition

BounceBack Biostimulant

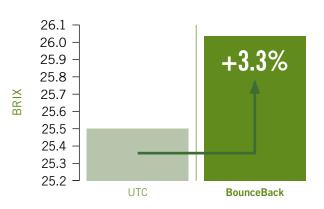

Guaranteed Analysis:

Total Nitrogen (N)	4.0%
4.0% Nitrate Nitrogen	
Calcium (Ca)	3.0%

Derived from: Calcium gluconate and calcium nitrate.

BounceBack Increased Brix in Wine Grapes

- Trial conducted on zinfandel wine grapes in Lodi, CA
- BounceBack resulted in a 3.3% increase in berry brix over the untreated control (UTC).

HOW TO USE	
Сгор Туре	Wine Grapes
Use Rate	Apply 1 qt/acre. See label for details or contact your crop advisor or Valent BioSciences for additional information.
Application Timing	Berry development, every 14 – 21 days
